DETAILED ACTION

Claim Objections

1. Claims 1 and 14 are objected to because of the following informalities: In claims 1 and 14, lines 8 and 9, "the base" should be -- the base member --. Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by Christensson (5,219,087).

Christensson discloses, in figs. 7 and 8, a closure comprising a base member 3, a flap 4 joined to the base at a hinge line, a tear strip 8' formed on an edge of the base member opposite the hinge line and connected to the base member by a frangible web 10', the tear strip hinging about the frangible web to a position the front edge of the flap, and at least one plastic weld 24 for connecting the overlying edge of the tear strip to the flap to provide a tamper evident feature.

Allowable Subject Matter

3. Claims 1-13 and 15-20 are allowed.

Art Unit: 3727

4. The following is a statement of reasons for the indication of allowable subject matter: claims 1-13 and 15-20 have been allowed because the prior art of record does not disclose or suggest a closure for a container comprising a base member having a plurality of dispensing openings, a plurality of flaps joined to the base member at an elongated hinge line, the flaps having front edges opposite to and parallel to the hinge line, a tear strip formed on an edge of the base member opposite the hinge line and connected to the base member by at least one frangible web, the tear strip hinging about the frangible web to a position overlying the front edges of the flaps, and plastic welds for connecting the overlying edge of the tear strip to provide a tamper evident feature.
